PROJECT NAME AND DESCRIPTION OF WORK			
<i>(include property size, existing buildings, any slopes on-site, and all hard surfaces to be added with construction)</i>			
SUBMITAL REQUIREMENTS –			
<i>Provide two (2) full-size copies of any submittals required for the minimum requirements subject to your project</i>			
<input type="checkbox"/> Minimum Requirement #2 Only – <input type="checkbox"/> Minimum Requirement #2 Small Project Construction Stormwater Pollution Prevention Plan (SWPPP)			
<input type="checkbox"/> Minimum Requirements #1 - 5 <div style="display: flex; justify-content: space-between;"> <div style="width: 48%;"> <input type="checkbox"/> The COBG Stormwater Site Plan Short Form <input type="checkbox"/> Project Overview <input type="checkbox"/> Existing Conditions Summary <input type="checkbox"/> Soils Assessment <input type="checkbox"/> Minimum Requirements Narrative <input type="checkbox"/> Erosion and Sediment Control Plan <input type="checkbox"/> Maps, Plans and Drawings <input type="checkbox"/> LID Infeasibility Checklists </div> <div style="width: 48%;"> <input type="checkbox"/> The COBG Small Project Construction SWPPP <input type="checkbox"/> Erosion and Sediment Control Site Plan <input type="checkbox"/> Standard details of Best Management Practices (BMPs), when required <input type="checkbox"/> Engineering drawings and calculations of BMPs, when required <input type="checkbox"/> Requirements for Minimum Requirement # 5 below. </div> </div>			

Minimum Requirement #5 requires the use of On-Site Stormwater Management BMPs selected from a prioritized list. In order to select a lower priority BMP from the list, the applicant must first establish the infeasibility of using the higher-priority BMP(s).

Infeasibility is established by comparing specific site conditions and requirements with a list of infeasibility criteria given for the BMP in the 2014 Stormwater Management Manual for Western Washington. Infeasibility must be ascertained using site-specific information and may not be established by generalized knowledge. Some infeasibility criteria will require evaluation by a qualified professional as described in the criterion.

How was the feasible BMP identified for the project?

- Used the COBG Infeasibility Checklists or
- Met the LID Performance Standard

Please identify the BMP(s) below:

- Roofs will be constructed.

BMP Selected for Roofs: _____

- Other Hard Surfaces will be constructed (e.g. driveway, parking, patio, etc.).

BMP Selected for Other Hard Surfaces: _____

If the COBG Infeasibility Checklists were used to identify the feasible LID BMP(s) to be used for the project, please read below to identify any Competing Needs that may affect the feasibility of the proposed BMP.

LID Infeasibility due to Competing Needs -

The use of On-site Stormwater Management BMPs to meet Minimum Requirement #5 can be superseded or reduced where they are in conflict with:

- Requirements of the following federal or state laws, rules, and standards:
 - Historic Preservation Laws and Archaeology Laws as listed at <http://www.dahp.wa.gov/learn-and-research/preservation-laws>.
 - Americans with Disabilities Act. See the 2010 ADA Standards for Accessible Design.
 - Federal Superfund (general information at: <http://www.epa.gov/superfund/about.htm>) or Washington State Model Toxics Control Act (RCW Chapter 70.105D and WAC 173-340).
 - Federal Aviation Administration requirements for airports. See WSDOT's Airport Stormwater Design Manual.
- Where an LID requirement has been found to be in conflict with special zoning district design criteria adopted and being implemented pursuant to a community planning process, the existing local codes may supersede or reduce the LID requirement.
- Public health and safety standards.
- Transportation regulations to maintain the option for future expansion or multi-modal use of public rights-of-way.

Document the use of Competing Needs criteria to supersede or reduce use of On-site Stormwater Management BMPs in the LID Infeasibility Checklist.

Minimum Requirements #1 – 9

- Minimum requirements # 1-9 require engineering design and review. Design requirements can be found in the Stormwater Management Manual for Western Washington.

REQUIRED SIGNATURES

I certify, under penalty of perjury, under the laws of the State of Washington, that the foregoing is true and correct. (RCW 9A.72.085). I/we agree that City of Battle Ground staff may enter upon the subject property at any reasonable time to consider the merits of the application, to take photographs and to post public notices.
